Summary

Software developer building native iOS, Android, and web applications: Swift and Kotlin on mobile, Laravel and Next.js on the web. I have shipped six projects, four of them in teams, and I assist in four programming courses at my university.

Education

Universitas Ciputra Surabaya Informatics, Full-Stack Development · GPA 3.83 / 4.00 Related courses: Mobile Application Development (Swift), Visual Programming (Kotlin), Web Development (Laravel), Software Engineering.	Sep 2024 – Oct 2028 (expected)
Apple Developer Academy @ UC Surabaya Incoming Learner, Cohort 2027 · onsite program	Mar 2027 – Dec 2027
Apple Foundation Program, Apple Developer Academy @ UC Built a gamified time management iOS app with SwiftUI and SwiftData in a team, following Apple's Human Interface Guidelines and Challenge-Based Learning.	Jul 2024 – Aug 2024
SMA Santa Maria Surabaya Mathematics and Natural Sciences	Jul 2021 – Jun 2024

Experience

Intern, Universitas Ciputra Online Learning - Since December 2025, building a student business showcase website with a teammate using Laravel and MySQL. - Run daily virtual class operations: hosting Zoom sessions, recording lectures, and supporting lecturers and students. - Provide technical support for university seminars and events, and for entrepreneurship workshops at SMK Harapan Sejati.	Jun 2025 – Present
Student Assistant, Universitas Ciputra Surabaya Web Development (Sep 2026 – Present): mentor students from object-oriented PHP through Laravel, database migrations, and deployment; draft practice tests and manage the e-learning platform. Basic Programming (Sep 2026 – Present): assist first-year students in Java labs and grade weekly pre-tests. Advanced Programming (Feb – Jun 2026): assessed weekly Java assignments for correct use of OOP principles. Computer Organization & Architecture (Sep 2025 – Jan 2026): prepared lecture content, drafted exam questions, and managed grading.	Sep 2025 – Present

Projects

UC Online Learning Student and alumni business directory with AI testimony moderation (Gemini API), bulk spreadsheet import, and an admin approval workflow. Wrote most of the application (494 of 655 commits). Laravel 12, Blade, Alpine.js, Tailwind CSS, MySQL, Cloudinary.	Web · team of 2 · Dec 2025 – Present
YukDebat App for the debate community with a real-time sparring lobby, AI motion generator, and adjudicator feedback on case notes. Built the sparring rooms, motion generator, evaluation form, and admin moderation. Swift, SwiftUI (MVVM), Firebase Auth, Cloud Firestore, Gemini API.	iOS · team of 4 · May – Jun 2026
Dagify Business suite combining point of sale, ingredient-level inventory, cashflow, and CRM, with offline orders that sync later. Built the CRM module and authentication, worked on offline sync, and wrote unit tests. Swift, SwiftUI, SwiftData, Firebase, Swift Charts, Swift Testing.	iOS, iPadOS, macOS · team of 3 · May – Jun 2026

- Sum-O

Android + REST API · team of 3 · Dec 2025 – Jan 2026

Point of sale for owners with several stores: cashier flow, cash and QRIS payment, and revenue analysis. Wrote most of both codebases (95 of 143 commits). Kotlin, Jetpack Compose, Retrofit, Node.js (Express), Prisma, PostgreSQL.
- GKI Darmo Permai

Web · solo · Apr 2026 – Present

Church website and admin panel for schedules, e-bulletins, events, and media, with teams, roles, and two-factor authentication. Laravel 13, Inertia.js, React, TypeScript, shadcn/ui, Pest.
- FixIt

Web · solo · May 2026

Appliance repair marketplace with multi-step booking, order chat, payment verification, and role-based dashboards. Next.js (App Router), TypeScript, Prisma, MySQL, NextAuth.js.

Leadership

- Event Coordinator, Intern Hustle 2026

Dec 2025 – Aug 2026

Co-led the Event Division for career seminars, workshops, and internship placements; drafted ToR, rundowns, and MoU documents.
- Creative Member, then Creative Coordinator, GDG on Campus

Nov 2024 – Aug 2026

Facilitated Android Jetpack Compose Study Jam sessions; led the design team and promotion for Techvolution 3.0.
- PDD Design Coordinator, Hackfest 2026 and PULSE 2025, Student Union of Informatics

Jul 2025 – May 2026

Directed the design teams and built a shared Master Design system for all event assets.

Skills

Languages	Swift, Kotlin, Java, PHP, JavaScript / TypeScript
Mobile and web	SwiftUI, Jetpack Compose, Laravel, Next.js, React
Data and services	MySQL, PostgreSQL, Firebase, Prisma, Cloudinary
Deployment and testing	Vercel, Railway, Swift Testing, Pest
